### Switzerland's FGZO chooses the Tecnam P2008JC

On November 12nd, 2014 the membership of Zurich, Switzerland based Aeroclub Fluggruppe Zürcher Oberland (FGZO) selected the Tecnam P2008JC to be the next trainer of choice for their extensive training fleet.

The decision, voted by all 123 members, came out after a very detailed aircraft comparison presentation by Bruno Wettstein, President of FGZO and Philip Reich, Training Fleet Captain.

The FGZO membership were extremely impressed with the P2008JC's low noise signature, its comfort, ease of use and its unbeatable operating costs.

Walter Da Costa, Tecnam's Head of Sales and Marketing said, "We were delighted to be invited to participate in FGZO's rigorous selection process and especially as following an intensive evaluation, that we were selected above a number of other competitors. FGZO not only valued the overall benefits the P2008JC will bring to their fleet but particularly appreciated the on-going services and support that Tecnam have firmly established a great reputation for".

The Tecnam P2008JC is a single engine, high wing, two-seater training aircraft built in Italy. It has a carbon-fibre fuselage, metal wings and stabilator and a fixed tricycle undercarriage. It is powered by a Rotax 912 piston engine, utilising both Mogas and Avgas and ensuring exceptional low fuel consumption. FZGO has opted for full electronic flight display screens, with night capability providing conventional standby instruments.

With many Tecnam P2008's already in service worldwide, including 15 aircraft operating with Aero-Club Air France, the fully EASA certified Tecnam P2008's versatility and ease of use has established it as both the aircraft of choice for Flight Training Organisations as well as recreational flyers.

***TECNAM traces its roots back to the activities of the Italian brothers Luigi and Giovanni Pascale, who developed and produced innovative aircraft soon after the end of WWII (1948) and have continued ever since to create original models that gained worldwide recognition under the name Partenavia. Established in March 1986, Costruzioni Aeronautiche TECNAM now operates in three production facilities. The Casoria facility is located adjacent to Naples Capodichino Airport. The Capua facility is located adjacent to the “Oreste Salomone” Airport. Recently a new facility was established in Sebring, Florida, USA to serve and support the needs of Tecnam North American based owners and operators.***
