## News Release

November 28, 2017

# Tecnam U.S. delivers the first three of thirty Special Mission Platforms for geospatial data acquisition.

Tecnam U.S. announced today that on October 2<sup>nd</sup>, 2017 and November 20<sup>th</sup>, 2017 it completed the delivery of the first three (3) of an order for thirty (30) P2006T twin engine aircraft in its Special Mission Platform (SMP) configuration. The three aircraft now delivered are part of a 24-months contract to deliver 30 SMP aircraft to a geospatial data acquisition company modernizing its fleet to optimize operational costs and sensor availability. The company has options for an additional 24 P2006T SMP aircraft following the delivery of the first 30 aircraft commitment.

For this 30 aircraft contract the Tecnam SMP will be delivered with its standard, field proven, mission power system and dedicated hatch to accommodate multiple sensor packages, managed by Tecnam as Type Certification design changes.

The contract also provides for additional design services from Tecnam to optimize the installation for specific sensor packages under Tecnam's design authority and experience.

*"Given the age of existing sensor platforms, costs to operate them and changes in the requirements of the sensors themselves, the P2006T is the right platform at the right time for bringing geospatial data sensing up to date. We are proud that our Customer has chosen Tecnam to provide aircraft for their fleet expansion and look forward to the opportunity to evolve the data sensing platform paradigm",* said **Paolo Pascale, CEO of Tecnam**.

## About TECNAM; “Quality Aircraft since 1948”

TECNAM's roots go all the way back to the Italian brothers Luigi and Giovanni Pascale who began to develop and produce innovative aircraft soon after the end of WWII. Since those early beginnings, the family has continued to create original models, first gaining worldwide recognition under the name Partenavia, which translates as "Naples Aviation".

Costruzioni Aeronautiche **TECNAM** was established in March 1986 and now operates in three production facilities. The Casoria facility is located adjacent to Naples' Capodichino Airport while the main factory is next to the “Oreste Salomone” Airport in Capua. The third facility, Tecnam US Inc., is in Sebring, Florida, USA to serve and support the needs of Tecnam's North American-based owners and operators.
