## TECNAM PRESENTS THE P2002JF MkII IFR

Friedrichshafen, Germany - Tecnam announced today the latest edition of its popular low wing two-seater P2002 Night now completing full IFR, VFR Day/Night certification in both the CS23 EASA and FAR23 FAA categories.

The Tecnam P2002JF MkII IFR has developed as a result of customer feedback from both private customers and flight training organisations, who have a sizable need for a two seat IFR aircraft with the well proven, efficient engine ROTAX 912. It is the lowest Acquisition Price aircraft in the IFR segment.

With a MTOW of 650 kg, the P2002JF MkII IFR features outstanding performance and flying qualities. It is equipped with latest glass Garmin G500 Txi avionics, designed specifically for CS23/FAR23 aircraft. Twin touchscreens integrate with the GTN GPS/Nav/Comm series, GDU700P MFD/EIS with integrated ADAHRS to providing a fully certified glass suite solution.

The ease of flying and maintenance make this aircraft an excellent solution for training in flight schools, but also fun for private use. The option to use multi-fuel makes this aircraft an even more flexible and cost effective. Due to the tapered laminar aerofoil and the slotted flaps the P2002JF MkII is an outstanding aircraft, a perfect mix of aerodynamics, performance, and structural efficiency.

A number of flight schools, including three launch customers F-AIR, Bartolini and EAS Barcelona Europe have already selected the P2002JF MkII as their ideal aeroplane for students initial training towards the ATPL.

**Walter Da Costa Tecnam Global Sales and Marketing Director:** "We are so proud to have the new P2002JF MkII IFR among our CS/23's Fleet. Now we can offer the most affordable IFR Two-Seat Single-Engine in the market. For us this is the proof that Tecnam is able to offer a real "one fleet solution", this is our strategy.

### **About TECNAM; "Quality Aircraft since 1948"**

TECNAM's roots go all the way back to the Italian brothers Luigi and Giovanni Pascale who began to develop and produce innovative aircraft soon after the end of WWII. Since those early beginnings, the family has continued to create original models, first gaining worldwide recognition under the name Partenavia, which translates as "Naples Aviation".

Costruzioni Aeronautiche **TECNAM** was established in March 1986 and now operates in three production facilities. The Casoria facility is located adjacent to Naples' Capodichino Airport while the main factory is next to the "Oreste Salomone" Airport in Capua. Recently a new facility was established in Sebring, Florida, USA and in Australia to serve and support the needs of Tecnam's local owners and operators.
